

Andrew Quinn Jaques

CLOUD SECURITY & AI — CISSP

andrewquinnjaques@gmail.com

+61 403 794 749

Sydney, Australia

PROFILE

Cloud security leader with 8+ years securing large-scale AWS environments, now leading agentic AI initiatives within a major bank's audit function. Combines deep hands-on security engineering (CSPM, automated controls, DevSecOps) with practical delivery of AI-driven automation — including workflows cutting testing development time from a week to an hour. Proven at building and mentoring teams, influencing C-suite stakeholders, and turning security compliance into an engineering discipline.

EXPERIENCE

Senior Audit Manager – Cloud & Engineering

Aug 2025 – Present

COMMONWEALTH BANK

- Led a group-wide audit (team of 6) across Cloud, Cloud Security and Engineering, identifying the **only High-risk finding raised across the Tech & Cyber portfolio that year** — escalated to C-suite, with remediation actions spanning cyber, cloud and cloud security
- Own engineering and architecture of an audit testing automation platform delivering real-time control compliance reporting — projected to automate **~20% of audit testing**, with scope to grow to **30–40%**
- Lead working groups delivering agentic AI initiatives to increase the speed, coverage and accuracy of security configuration testing, including AI-driven development workflows reducing test development time **from ~1 week to ~1 hour**
- Communicate and influence Executive and General Managers on the risk profile of audit findings, and partner with them to uplift working practices across the audit process
- Mentor Audit Managers across the Tech & Cyber portfolio on technical skill development and career progression

AWS Security Engineer – CSPM Lead

Jan 2025 – Jul 2025

HSBC

Owned compliance detection tooling — rule creation and integration into downstream services consumed by AWS platform users bank-wide, and a key input to risk forums.

- Led and mentored a team of engineers delivering security controls on a risk basis, in conjunction with security leads across Cybersecurity and Architecture
- Delivered automated security controls within the CSPM tooling, prioritising high-profile detections
- Led all technical audit requests, liaising with internal and external auditors
- Uplifted CI/CD pipelines to enhance DevSecOps maturity
- Defined the product roadmap and delivery goals based on resourcing and team strategy; identified and prioritised process weaknesses for uplift
- Managed the vendor relationship and communicated team strategic goals to the senior management team

AWS Security Engineer

Jul 2022 – Dec 2024

HSBC

- Built automated security controls using CSPM tooling (Wiz, JupiterOne), managing testing and deployment across dev, pre-prod and prod environments
- Managed CSPM/CNAPP tooling integration for control automation, **reducing development time from weeks to days**
- Automated compliance workflows and security assessments using Terraform and Python (Boto3)
- Developed CI build pipelines with enhanced testing to reduce run-time errors, using Jenkins, AWS CodePipeline and GitHub Actions
- Performed log analysis for bug fixing and incident management/response; partnered with platform users to identify false positives and escalate to the vendor

Cloud Controls Lead

Nov 2021 – Jul 2022

HSBC

Promoted within previous team to lead the review function.

- Led a team of reviewers conducting risk and controls assessments on high-risk projects, ensuring compliance with bank and industry security standards
- Expanded team capacity **from 5 to 10 members**, improving review efficiency and delivery timelines
- Implemented JIRA-based control tracking, **reducing engagement timelines by 50%** and improving auditability
- Managed cloud security control reviews across multiple business units, driving governance and regulatory alignment
- Provided risk reporting to senior management and governance boards, influencing security strategy; developed standardised review processes

Cloud Technology Control Manager

Sep 2018 – Nov 2021

FDM / HSBC

Joined as a consultant; offered a permanent position within the bank.

- Designed, managed and delivered controls reviews across applicable security domains for multiple concurrent projects, with reporting viewed by stakeholders up to C-suite
- Conducted 3rd-party security assurance reviews, including in-depth analysis of control operation in relation to HSBC data
- Partnered with 2LOD to identify and reduce security risk in direct use of cloud technologies; worked with internal and external audit partners to report and remediate findings

Information Governance Support Officer

Jul 2014 – Jul 2015

NEWCASTLE UPON TYNE HOSPITALS NHS TRUST

Supported Information Governance and IT Security across three hospitals — reviewing patient-data research requests against regulatory requirements and gathering evidence for ISO 27001 certification.

CERTIFICATIONS

CISSP	2021	AWS Certified Cloud Practitioner	2021
AWS Certified Security – Specialty	2023	ITIL v3 Foundation	2018
AWS Certified Solutions Architect – Associate	2022	PRINCE2 Foundation	2018

EDUCATION

BSc Applied Computing – Cybersecurity (2:1)

2015 – 2018

NEWCASTLE COLLEGE
